I have been a subscriber of XM radio for about one year and I am very happy with the variety of programming they offer, which is not available on AM and FM radio. I am a physician working evenings and weekends in several urgent care clinics in Atlanta, GA. I often spend more than one hour driving to and from work, sometimes coming home around midnight. Listening to XM radio makes my commuting so much easier to deal with. The monthly payment of around 10 dollars is a very good value for me. I am looking forward to having Atlanta traffic and weather available later in 2004. I urge you to reject the NAB's petition 04-160 and support XM's radio's freedom to offer excellent programming for those who want to pay for it. The USA is a great country for many reasons, one of which is a free market system which allows people to purchase products that are of value to them. I want to be able to have the freedom to listen to XM radio and pay for programming it offers, like local traffic and weather, as well as many other great channels.
